Roller Chain

Haul-Off / Puller Roller Chain with K1 Attachments

Allows users to fasten screws to the chain and accurately position their puller blocks

CR Flex Oil lubricant

This option is recommended for all plastic manufacturers / processors and designed to increase the life of your roller chain, and decrease costly downtime

- Dry lubricant for haul-off/puller chains
- Helps delay stretching of your puller chain
- Superb anti-wear agent withstands extreme pressure
- Dries to a hard film that won't sling or rinse off
- Fights rust, corrosion, and salt water
- Withstands temperatures from 20F to 700F once cured
